

Product Guide

Dollar FX Futures

Abril 2024

Matba Rofex

Argentina Clearing

1. SUMMARY

This document introduces the main characteristics of US Dollar Futures and the basic aspects of its negotiation. The guide is completed with information on how to prepare your *front-office* and *back-office* systems to incorporate this product.

The content of this document is merely informative and its purpose is to summarize the main points of interest related to the trading of US Dollar futures and options contracts. Although this document includes the contract's most important characteristics up to this date, they are subject to changes based on the market's situation. The trading guide neither replaces nor complements the Internal Rulebook, the terms and conditions of futures and options contracts, Directives, or any other provision issued by the Board of Directors and other competent bodies of MATBA ROFEX S.A. and of the Clearing House adhered.

In case of divergence, the Spanish version prevails.

2. DOLLAR FUTURES&OPTIONS

2. a. Description

The American Dollar is the official currency of the United States of America and for other nations that use it as such. The main advantage that takes the use of the American Dollar as a currency in other countries is in its reliability, since along its history it has not presented big changes in its design as also in its quotation.

2. b. FUTURES - Specs

Currency Pair	USD/ARS
Contract size	1,000 US Dollars.
Trading and Quotation Currency	Each contract will be denominated, quoted, and traded in Argentine Pesos ("Pesos") per Dollar.
Listed Contracts	Every calendar month.
Termination of trading	Last business day of the contract month.
Minimum price fluctuation (tick)	0.50 ARS (fifty cents) per USD (50 ARS per contract)
Maximum price fluctuation	Established in the scenarios used to calculate margins. This maximum fluctuation shall not be applied when the respective contract has not been traded the previous day. In the event that this maximum fluctuation is reached, trading may be suspended and, if it is necessary, additional margins may be required.

Settlement Procedures	<p>Final settlement under the contract shall be by cash settlement. The final settlement price will be based on:</p> <ol style="list-style-type: none">1. The Reference Exchange Rate calculated and published daily by the Argentine Central Bank, according to Communication "A" 3500 dated 03/01/02, on the contract's expiration day or any communication published by the Argentine Central Bank that replaces it in the future.2. If there is no rule to replace it, the Average Weighted Price on the date of expiration of the contract of the ticker UST\$T (dollar transfer against peso transfer) of the CAM1 trading session of the "Mercado Abierto Electrónico" in the shorter negotiated term will be taken.3. In the event that the final settlement price cannot be established according to the above mentioned procedure, the Board of Directors shall declare an emergency and determine the corresponding final settlement price, in accordance with the statutory and regulatory powers and pursuant to what is set forth in point 14. – Emergencies -, of these Contract Specifications.
------------------------------	---

2. c. OPTIONS - Specs

Underlying	USD/ARS Futures
Contract size	1 US Dollar Future Contract.
Listed Contracts	Every calendar month.
Termination of trading	Options shall expire and can be traded up to the expiration day of the underlying futures contract.
Minimum price fluctuation (tick)	0.01 ARS per USD (10 ARS per contract).
Trading and quotation currency	Equal to those of the underlying futures contract.
Style	Equity ^(*)
Exercise Style	American style.
Mark-to-Market	There is no mark-to-market. The Net Settlement Value ^(**) of the option is computed in the margin requirement.
Margin	Only the seller must deposit margins. The buyer receives a credit for the Net Liquidation Value ^(**) of the option, which can be applied to cover the margin requirement of the portfolio.

(*) For more information on the style of options, consult the Product Guide- Options on Futures at the following [link](#).

(**) Net liquidation value or option value (similar to the settlement price of an option), is equal to the intrinsic value (arising from the calculation of scenarios) + time value of the option.
